

Company Profile

Illuminating Spaces with Purpose and Precision

Who We Are

Lampada Lighting is a forward-thinking lighting company dedicated to delivering high-quality, design-driven lighting solutions for residential, commercial, and architectural environments. With a strong focus on both aesthetics and functionality, we help clients transform spaces through carefully curated lighting that enhances mood, usability, and visual appeal.

Lampada Lighting is proudly 100% Australian owned and operated, with a strong industry presence since its establishment in 2009.

At Lampada Lighting, we combine industry expertise with a passion for design to create lighting solutions that are both practical and inspiring. Our team understands that lighting is more than just illumination—it's a key element of how people experience a space.

We work closely with architects, engineers, builders, electricians and designers to ensure every project is executed with precision, efficiency, and attention to detail.

Lampada Lighting is headquartered in Parkinson, Brisbane, where our primary warehouse is fully operated in-house to maintain strict quality control and efficient order processing. This is supported by two strategically located third-party warehousing facilities that manage our bulk storage, ensuring strong inventory capacity, reliable stock availability, and fast, consistent delivery across all project types. Lampada also operates its own fleet of delivery vehicles—including utes, vans, and a larger pallet truck—supported by dedicated in-house drivers, allowing for greater flexibility, reliability, and control over project deliveries.

What We Do

Lampada Lighting offers a comprehensive range of products and services, including:

- Architectural & Decorative Lighting
- Residential Lighting Solutions
- Commercial & Retail Lighting
- Custom Lighting Design Support
- Energy-Efficient & LED Solutions
- Lighting Supply & Specification

Our product range is carefully selected to balance performance, durability, and contemporary design, ensuring long-lasting results across all applications.

Our Approach

We take a collaborative, client-focused approach to every project. From initial concept through to supply and installation support, we prioritise clear communication, reliability, and delivering outcomes that exceed expectations.

Why Choose Lampada Lighting

- Strong focus on quality and design
- Reliable supply and industry knowledge
- Tailored solutions for every project
- Commitment to energy efficiency and innovation

Lampada produces light fittings using only top-tier components from leading manufacturers such as OSRAM, Cree, Bridgelux, BOKE, Tridonic, Philips, and Epistar, ensuring superior quality, performance, and reliability across its range. Lampada Lighting partners with some of the world's leading factories—each publicly listed and ISO-certified—providing strong, reliable manufacturing support and consistent product quality across all projects.

Lampada Lighting employs a team of over 75 staff, including more than 20 qualified electricians who are available to assist with repairs, maintenance, and any issues that may arise during or after practical completion, ensuring ongoing support and peace of mind for every project.
